Vogue templates: About page

support.pixelunion.net/hc/en-us/articles/360033274533-Vogue-templates-About-page

Vogue provides an alternate page template to include a full-width **Featured image** at the top of the page.

Thanks to Elizabeth Dye for allowing us to use her beautiful images in this demo. Below is a little bit about Elizabeth and how she started her business:

Assigning the template to a page

In the page editor, scroll to the bottom right of the screen and select **page.about** from the **Templates** dropdown menu. This dropdown will only appear if the published theme contains page templates.

Open the page in the theme editor

To access the about page settings, go to the theme editor (**Customize**) and select thepage from the page dropdown.

Add the featured image

Click **Select image** to locate the image to display here. Images should be larger in dimension in order to adapt to larger window and device widths.
