Vogue sections: Featured content

support.pixelunion.net/hc/en-us/articles/360031493274-Vogue-sections-Featured-content

The **Featured content** section highlights and directs users to content that exists elsewhere on your storefront—be it a product page, blog post, static page, etc.
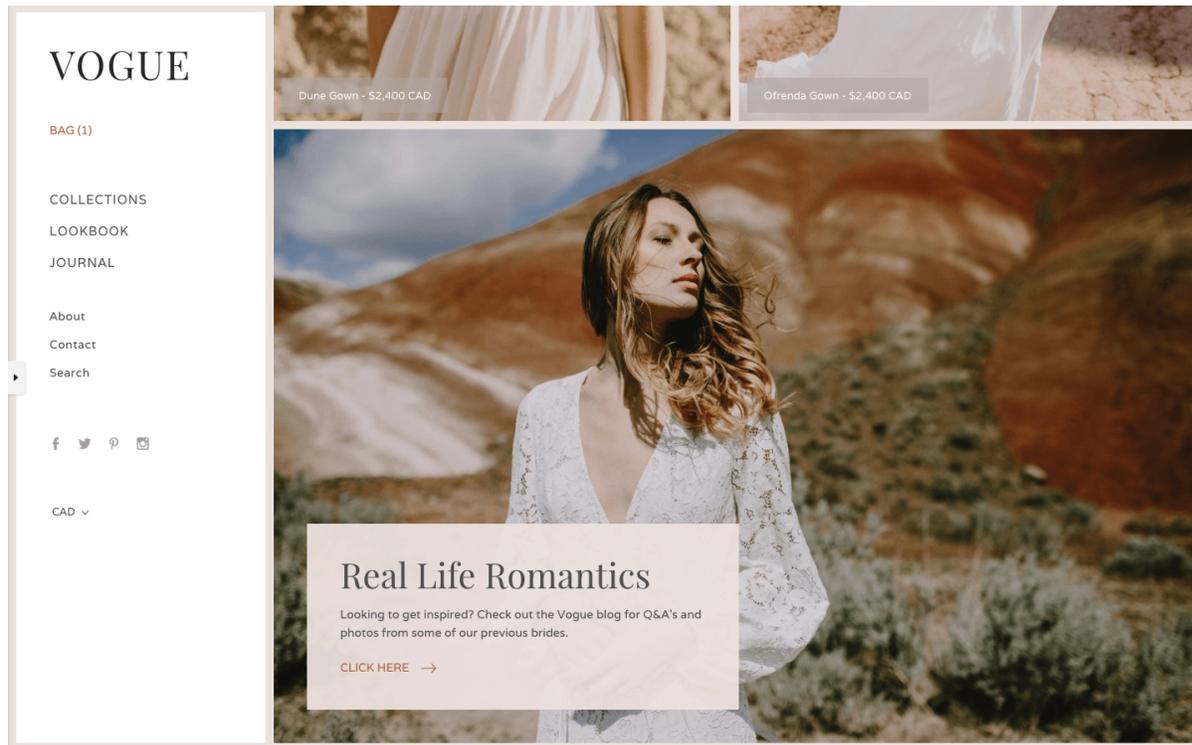

Add **Featured content** to your home page

1. In the theme editor (**Customize**), click **[+] Add section**
2. Locate **Featured content**
3. Click the section, then **Add**
4. **Save**

Select a section height

Choose a **Section height** option from the labeled dropdown menu. **Image height** is the natural height of the image when you upload it, while **Fullscreen** will expand it so that it fills the entire viewport.

Add copy and content

Add the text for the section using the **Heading** and **Text** fields.

Include a link by customizing the **Link text** and **Link URL**.

Select the image to display

Select the **Image** you want to display by clicking Select image.

Set the **Image position**. This setting determines the focal point of the image.
