

Vogue sections: Featured collection

support.pixelunion.net/hc/en-us/articles/360031484934-Vogue-sections-Featured-collection

The **Featured collection** section is designed to draw attention to products from a specific collection on your home page.

Add **Featured collection** to your home page

1. In the theme editor
(**Customize**), click **[+] Add section**
2. Locate **Featured collection**
3. Click the section, then **Add**
4. **Save**

Select the collection to display

Use the **Select collection** button to assign the desired collection to use for this section.

Configure collection settings

Include the collection's description

You can also check the **Show description** box to include the collection description.

Product image display

Select the **Product aspect ratio** to use to display your collection images. The aspect ratio is essentially the proportions of the image width and height. You can opt to display them in their original aspect ratio (**Original**), wider than tall (**Short**), equally wide as tall (**Square**), or taller than wide (**Tall**).

Manually set products

By default, Vogue will display the first four products in a collection. To specify which products are displayed, click the **Enable** checkbox beside **Manually set products**, and then add them by selecting **[+] Add product**.
