Vogue sections: Image with text overlay

Image with text overlay sections feature immersive, high-quality images building your brand, highlighting special promotions, and more.

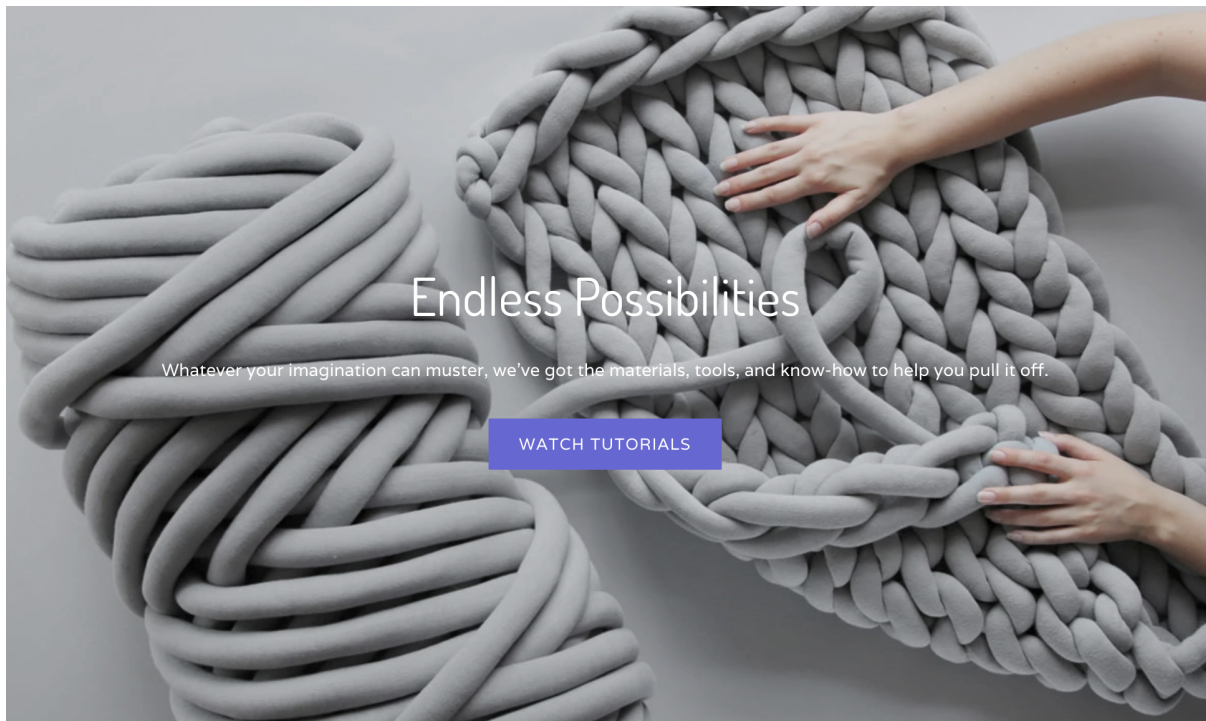

Add **Image with text overlay** to your home page

1. In the theme editor (**Customize**), click **[+] Add section**
2. Locate **Image with text overlay**
3. Click the section, then **Add**
4. **Save**

Customize section settings

Click the **Image with text overlay** section to customize its content and settings.

Select section height

Select an option from the **Section height** dropdown. **Image height** is the natural height of the image when you upload it, while **Fullscreen** will expand it so that it fills the entire viewport.

Set up the image

Click **Select image** to locate and assign the desired image. The image used in this section should have a width of at least 1400px to adapt to larger screens and window widths.

Image focal point

Adjust the focal point of the image by changing the **Image position**. This setting only has an impact if the **Section height** is set to **Fullscreen**.

Arrange the text

Use the **Heading** and **Text** fields to include the messaging for this section.

Text alignment

Select an option from the **Text alignment** dropdown to align the text to the **Left**, **Center**, or **Right**.

Text position

Choose an option from the **Text position** dropdown to control where the text appears on the image.

Adjust the heading font size

Use the **Heading size** dropdown to adjust the font size of the heading text.

Include a call-to-action

Use the **Button link** and **Button label** fields to customize the text and direction of the call-to-action (CTA) button.

Include an overlay

Select **Enable overlay** to activate an overlay color to increase the contrast between the text and image.

Choose an option from the **Style** dropdown. The options are:

- **Light text on dark overlay**
- **Dark text on light overlay**
- **Accent**

Use the **Opacity** slider to control the transparency of the overlay color. Values closer to 0% will be more transparent, while those closer to 100% will be more opaque.
