# Studio Theme Manual

6 months ago · Updated

*Please note that this theme currently has limited support, meaning we may provide bug fixes and security updates, but are not regularly updating it. As of March 31, 2018 we will be discontinuing support completely for our WordPress and Tumblr products. Thank you for understanding.*

## Featured Tags and Galleries

Studio supports unlimited featured tags and galleries. When a featured tag is specified a link to the tag gallery is added to the sidebar.

To begin, simply tag your posts as usual, then return to the customization screen. Now, tell Studio which of those tags are to be "featured" or indexed

by inputting them into the "Gallery tags" text field (separated by commas).

For example, say you want to feature the tags "Books" and "Bacon". Simply add "Books, Bacon" (the comma and space are crucial, by the way) to the "Gallery tags" text field. Save your changes and refresh your blog to view the changes.

Lastly, the title of your Gallery list (in the sidebar) can be customized using the "Gallery List Title" option in the customization screen.

## Thumbnail Titles

Studio supports titles for individual posts. Simply bold the first line of text in a particular post and it'll appear as the thumbnail on the index.

## Header Options

Studio comes packed with four header fonts to choose from: Baskerville, Lato Black, Open Sans, or Roboto. The size of the header text can also be customized to small (22 px) medium (27 px) or large (32 px).

## Sidebar Options

Studio's sidebar can be given a custom background image (ideally in a portrait aspect ratio), and its darkness can be adjusted (in 20% increments) using the Sidebar Darkness option in the customization screen.

## Thumbnail Aspect Ratios

The thumbnail tiles comprising Studio's main portfolio view have three selectable aspect ratios: landscape (4:3), portrait (3:4), and square (1:1).

## Facebook Commenting

Studio supports Facebook commenting. Setting up FB comments is easy: simply input your Facebook username and you're set. However, to enable administrative functions on your comments, try the following:

- First, head to the [Facebook Developer site](#) and either create a new account or sign in if you already have one. Once you're logged in, click "Create New App."
- Input any name you'd like for your hypothetical app (you're not actually making one, don't worry), do the safety dance, and click Continue. From here, you should be taken to your new app's info page.
- Copy the App ID located just below your app's name (at the top of the page) and you're all set. Now head back to your blog and input your API ID into the "Facebook API ID" field in the customization sidebar, and make sure you've checked "Facebook Comments On."

## Disqus Commenting

Studio also supports Disqus commenting. Simply input your Disqus shortname into the corresponding field in the customization options.

## Social media links

Studio provides custom icons for: Bandcamp, Behance, Delicious, DeviantArt, Digg, Dribbble, email, Etsy, Facebook, FLickr, Foursquare, Github, Google+, Instagram, LastFM, LinkedIn, Myspace, Pinboard, Pinterest, Rdio, Skype, Soundcloud, Spotify, Steam, Stumbleupon, Svpply, Vimeo, and Youtube.

## Site Tracking

Studio also supports Google Analytics: just input your GA Property ID into the corresponding field in the customization screen.

## World-class customer support

Our support staff is committed to helping you solve any problems you encounter along the way. Exceptional, human support matters to us a great deal. [Contact us](#) or check our [help centre](#) if you need any help at all.
