

# Setting up the Sugar theme's footer

## Featured-In Images

Sugar allows you to display up to 3 images (optionally linked) images in your footer, and while the feature *is* called Featured-In images, it could potentially be used for any set up images you'd like to display (such as sponsor logos, linked banners, etc).

## Footer Text

Use this text box to place any important text in the footer. This could be used for an address, phone number, or other helpful information.

## Payment Icons

Payment icons are displayed below your store's copyright message in the footer. Icons are displayed based on your accepted payment settings in Shopify.
